Social media in the transportation industry

In the logistics and transportation industry, social media is used as a tool for business only. There aren't any interactions with customers. Companies are unaware of the parameter of social media comments about services or even the system. Social media tools might pose helpful information for the carrier, logistics manager and their management; the challenge lies in how companies handle the reviews and collect information to provide valuable data. Below are some of the advantages of social media to logistics companies:

- 1) Faster updates for shipment schedules; an increase in the tracking and visibility of your supply chain.
- 2) Information about accidents, traffic jams etc. in order to re-route deliveries.
- 3) Information about weather conditions and other natural aspects that might affect your shipment or deliveries.
- 4) Learn more about the latest trends and other valuable insights from customers and leaders of industry.
- 5) Share or obtain data for risk identification, and reveal the dangers in your supply chain.
- 6) Search and collect innovative ideas from different points of view to further improve your business offers.
- 7) Reach out to new employees, customers, business partners and opportunities.

The Ascend Forest Project – planting 10,000 trees

Ascend are helping to restore some of the world's most threatened forests by planting a tree for every policy and vehicle insured in 2022.

Where environmental change is concerned, everybody in the world benefits from trees, as they assimilate carbon dioxide (CO2) that in any case adds to a worldwide temperature alteration. Along with non-benefit foundation, MoreTrees. Ascend Broking is helping make it conceivable to plant new local backwoods in Madagascar, Kenya and Haiti.

Each tree planted ingests carbon dioxide from the air, balancing your carbon impression. It additionally delivers oxygen, channels the air, channels precipitation and increments environmental dampness.

We partner with MoreTrees and regulated non-profit NGOs (non-government organisations) across the world, who work with local communities to plant trees while reducing extreme poverty and combating deforestation.

We are planting trees in:

- Madagascar
- Haiti
- Kenya
